Vintage Dark Hickory Deck

DECK PORCH RAIL PAVERS TRIM MOULDING

VINTAGE COLLECTION

- The latest technology and breakthrough aesthetics with realistic wood appearance
- Rustic texture found traditionally in reclaimed wood and indoor flooring
- Rich colors with dramatic streaking that truly emulate tropical hardwoods
- Exclusive embossing pattern with fine texture lines
- Slight board-to-board color variation simulating hardwoods
- Enhanced colorfastness
- Hidden fastening options
- Unique color variations within each board of the Vintage Collection are designed to emulate the natural aesthetics of exotic hardwoods

ARBOR COLLECTION®

- Warm, vibrant wood tones with natural color variations
- Subtle streaking to mimic exotic wood
- Embossing texture with wider linear grain pattern
- Slight board-to-board color variation
- Unique color variations within each board of the Arbor Collection are designed to emulate the natural aesthetics of exotic hardwoods

XLM® TROPICAL COLLECTION

- Pronounced color streaking and bold color selection
- Distinct embossing pattern
- Hidden fastening options
- Unique color variations within each board of the XLM Tropical Collection are designed to emulate the natural aesthetics of exotic hardwoods

TERRA COLLECTION

- Rich earth tones of two of the most popular shades
- Graining pattern that has peaks similar to those found in real wood
- Enhanced graining texture highlighted to provide a more dramatic look
- Solid color tones provide more consistent board-to-board color

HARVEST COLLECTION®

- Calming earth tones in the most popular shades
- Wood-like peaked graining texture
- Consistent board-to-board color
- Hidden fastening options

XLM® NATURAL COLLECTION

- Cool color palette
- Consistent board-to-board color
- Subtle graining pattern
- Hidden fastening options

Outdoor Living Solutions

Hardware Finishes

AZEK Bench & Planter Kit

Our Bench and Planter Kit has a beautifully integrated adjustable bench and can be configured with a flower box at each end. You can choose a color to match your AZEK Deck or AZEK Porch or one that complements your space and style. Choose from two hardware finishes: Titanium or Bronze.

AZEK In-Deck Storage Kit

The AZEK In-Deck Storage Kit is the perfect place to store your outdoor items without losing valuable deck space. Measuring just over 6 ft. long with 17.5 cubic feet of storage space, the AZEK In-Deck Storage Kit is the perfect solution.

AZEK RAIL

PREMIER RAIL

AZEK Premier Rail, a classic Victorian profile, is available in five colors and offers you the ability to customize with five unique infill options: composite balusters, round aluminum balusters, square aluminum balusters, cable and glass kit.

TRADEMARK RAIL

AZEK Trademark Rail, a Colonial profile, is available in white and offers you the ability to customize with five unique infill options: composite balusters, round aluminum balusters, square aluminum balusters, cable and glass kit.

RESERVE RAIL

AZEK Reserve Rail offers a larger architectural profile and works well in larger scale spaces and is great for porches. It is available in white, and offers you the ability to customize with five unique infill options: composite balusters, round aluminum balusters, square aluminum balusters, cable and glass kit.

AZEK Rail offers a variety of infill options including Composite Balusters, Square and Round Aluminum Balusters, Cable, and a Glass Hardware Kit.

AZEK COLUMN WRAP

The 3-Plus-1 column wrap profile allows for easy one person installation, saving time and installation costs. Three connected panels and a fourth “locking” panel fit easily around a structural support with press fit seams and nicely finished corners. AZEK Column Wrap is available in the semi-matte traditional white finish.

AZEK Trim and AZEK Mouldings should be installed using the same good building principles used to install wood or composite trim and mouldings and in accordance with the local building codes and established installation guidelines. AZEK Building Products Inc. claims no liability or responsibility for the improper installation of this product.

AZEK Trim and AZEK Moulding may not be suitable for every application and it is the sole responsibility of the installer to be sure that AZEK Trim and Mouldings are fit for the intended use. Since all installations are unique, it is also the installer's responsibility to determine specific requirements in regards to each trim application. AZEK Building Products recommends that all applications be reviewed by a licensed architect, engineer or local building official before installation.

Technical information and AZEK Trim and Moulding Installation Guidelines are available online at www.AZEK.com or from your local AZEK Dealer. If you have any questions or need assistance, please call AZEK Customer Service at 877-ASK-AZEK (877-275-2935) or visit www.AZEK.com.

AZEK MOULDING

High performing wood replacement mouldings available in a variety of profiles. A perfect match to AZEK Trim, AZEK Mouldings are known for longevity and durability. They won't split or rot and can be installed using traditional tools and fasteners.

AZEK PAVERS

Engineered to resist cracking and staining, AZEK Pavers provide long lasting good looks and are guaranteed for life not to crack (residential applications only). AZEK Pavers use a patented grid system that dramatically reduces installation time and takes the frustration and difficulty out of manually setting and aligning heavy concrete pavers. Made from up to 95% recycled materials, AZEK Pavers help projects earn LEED certification easier than any other pavement. AZEK Pavers outperform other pavers in LEED contribution, such as concrete pavers with fly ash, by more than 10 times.

DECKING

TRADITIONS

Make your space your own private getaway. No need for a secluded island. Not when you're surrounded by all the natural beauty of traditional composites – right outside your doorstep. These practical decking options are designed for the value-conscious customer. TimberTech's Traditions line of composite decking is engineered from a mixture of wood and plastic and offers unparalleled quality, slip resistant surface, low-maintenance care, and a 25-year limited warranty for residential applications. Say goodbye to annual painting, sealing and staining. Say hello to the good life.

ReliaBoard®

Value-conscious homeowners choose ReliaBoard for its traditional, wood-like look and low-maintenance. With such a surprisingly affordable alternative, there's simply no reason to settle for staining, sealing, splinters and constant upkeep.

TwinFinish®

Designed for versatility and expression – with the top side displaying our authentic, slip-resistant Vertigrain surface, and the bottom a serrated texture that's ideal for contrasting accents, built-ins, benches and boxes.

DockSider®

Perfect for heavy-use public places like theme parks, stadiums and hotels. Its robust, splinter-resistant surface and unique, 24-inch on-center span deliver decades of durable, low-maintenance performance. Whether it's a backyard deck, a yacht club marina or a seaside boardwalk – DockSider offers a clearly superior alternative.

DECKING

Earthwood Evolutions Tigerwood is designed to mimic the dramatic color variation between boards found in the natural hardwood Tigerwood.

EARTHWOOD EVOLUTIONS®

Now available in twelve heavenly hues. Earthwood Evolutions elevates your outdoor lifestyle – and scratch, stain and fade resistance – to a whole new level. Capped with a protective polymer shell, TimberTech's Earthwood Evolutions is resistant to the elements and accidents that every deck endures. Surround yourself in warm hardwood style and authentic variegated graining in four exclusive collections. Inspired by nature – improved by science – and backed with an additional 25-Year Fade and Stain Warranty for total peace of mind.

Legacy

Extend your indoor style and personality to your outdoor living experience. TimberTech's Legacy Collection has the appearance of beautiful hand-scraped hardwood that is unique to any other decking. This timeless style will adapt to any décor from rustic and traditional to eclectic and contemporary.

Tropical

A sun-soaked spectrum of tropical tones evokes the atmosphere of a beach-side, ocean-view retreat. The multi-color streaking in each board creates an authentic grain pattern, inviting you to relax and enjoy your personal tropical paradise.

Terrain

The timeless appeal of the earthy tones in the Terrain Collection make for captivating choices. The scalloped bottom edge offers an affordable alternative with the same superior quality and low-maintenance that homeowners have come to expect from TimberTech capped composites.

TIMBERTECH LIGHTING

Nothing creates after-dark ambience like the warm glow of perfectly balanced lighting. Designed to seamlessly integrate into TimberTech railings, decking and steps, our award-winning lights use low-voltage, energy-efficient LED lights to let you extend the use of your deck into the evening hours and cast a soft glow across steps and surrounding areas.

RAILING

TIMBERTECH RAILING

Contemporary or traditional? Classic or cutting-edge? A stunning outdoor oasis may start with the decking, but your harmonious choice of composite railing and lighting is what really lets your personal style shine through. That's why we've created the most extensive – and the most versatile – collection of options you can consider. From the clean, modern lines and sleek stainless steel cables to timeless forms with sturdy, palpable presence, you select the perfect pairing – then graciously await the compliments.

Evolutions Rail™ Contemporary Style

High-style, modern aesthetics meets low-maintenance sensibility. Evolutions Rail is a composite railing system that offers the best view of your surroundings and features a sleek, continuous top rail, uninterrupted by posts. This system is also designed to accommodate your choice of five dramatic infill options: stainless steel cable, square aluminum balusters, round aluminum balusters, glass channel kit or composite balusters.

Evolutions Rail™ Builder Style

Some simply love the dramatic lines – others appreciate a practical place to set drinks or small plates. Designed for value-conscious homeowners, Evolutions Rail Builder Style offers the same clean, flat, continuous top rail design in an affordable alternative with metal infill.

RadianceRail®

Smooth lines. Classic colors. Visible elegance. Invisible hardware. Our most popular railing adds a distinctive profile and sturdy, high-end presence to any deck. RadianceRail is offered in six colors with five infill options; composite balusters, square aluminum balusters, round aluminum balusters, cable, and our new glass kit. Mix and match in a myriad of combinations to suit your personal style. Add our seamlessly integrated lighting system or create custom curves to match virtually any deck shape. RadianceRail is also available in 10' sections in white and black.

RadianceRail Express®

Specifically designed for quick and easy installation, RadianceRail Express offers a high-quality, capped composite railing system with a solid feel and look of painted wood. At a surprisingly affordable price, RadianceRail Express is a must have for the value-conscious homeowner.

- Form dimensions

Preparing to Heat Form

- Layout wooden blocks to support cement board (8" x 65") and to protect work surface from heat

Heat Blanket

- Place heat blankets on Cement board

Preparing to Heat Form

- Begin preheating
 - Place 5" x 65" cement board between blankets
 - Set Controller to High
 - Preheat for 15-20 Min.

Preparing to Heat Form

- Preheating system
 - Do not allow heated portion of blankets to come in direct contact
 - Temperature should reach about 290 -300 degrees F
 - Lower heat if forming will not begin for some time

Heat Forming

- Place AZEK material (3/4"x 3.5"x 64") between blankets with preheated cement board on top and bottom as shown

Heat Forming

- Continue heating for 7 – 10 minutes temperature should reach about 300 F
- Periodically check temperature

Heat Forming

- When product is approaching final temperature check for consistency
- Consistency should be like cooked spaghetti

Heat Forming

- When proper temperature is reached place material over center of form
- Gently form material around radius
- If product wrinkles or feels too rigid to form straighten piece out before it cools too much and place back in heat blankets.
- If top edge wants to roll away or curl from form; a block of wood can be used to gently hold material flat while it cools. Too much pressure will mark the AZEK surface.

Heat Forming

- Clamp Product and allow to cool
- Product can be removed once cool enough to maintain its shape

Tips & Techniques

- Longer pieces of AZEK can be heat formed by heating one side at a time.
 - Lay blankets end to end without overlapping blankets
 - Begin heating product one side at a time. Flip product periodically until board reaches proper temperature.
 - A piece of preheated cement board can be used to keep top face warm during the heating process.
- A tight radius may have a tendency to wrinkle slightly on the inside edge of the formed piece. A router can be used to clean this edge up.
- Wrinkling on larger radius pieces may be an indication that the part has not been heated enough or that it has cooled too quickly

Where to Buy:

- Heat Blankets are available through your AZEK Building Products Dealer
- Or direct from Heatcon-
