Trex Transcend®

Outperforms, outresists, outlasts . . . basically
OUTDECKS ALL OTHERS

- Unparalleled beauty, distinctive, high-definition wood grain patterns are engineered with a low sheen and high-traffic technology that makes it last for decades longer than anything else on the market.
- Virtually indestructible shell, that's fade, stain, and scratch resistant. Cleans easily with soap and water making it an extremely low maintenance decking
- Trex decking is earth friendly. Made of 95% recycled materials, with manufacturing processes that are as green as they get
- 25-Year Limited Fade and Stain Warranty

KLEER®

LIMITED LIFETIME WARRANTY KLEER

The Look of Wood. The Luxury of Low Maintenance.

For the real look of wood, without the inherent maintenance, look no further. Here, you'll find the look you want—the style, curb appeal and elegance of wood—from Kleer PVC trim products. Plus, TruEdge technology provides a sealed edge that resists staining from dirt and grime, and easily wipes clean if dirt comes in contact with the trim-boards.

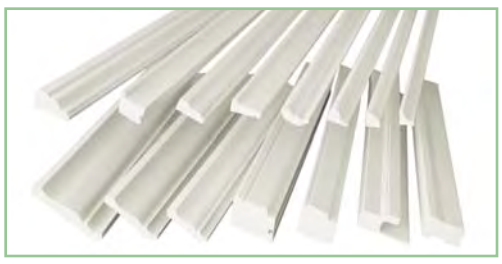
Kleer's innovative **TruEDGE® Technology** provides sharper, cleaner edges that resist dust and dirt, and a smooth finish that's easier to clean than wood trim or PVC boards with no sealed edge. Infused with UV inhibitors that prevent yellowing, they are perfect for creating authentic accents around windows, doors and more.

Available in:
Boards

Kleer Packs 1 (3/4") x 4, 6, 8, 10 & 12 all 18' lengths
5/4 (15/16") x 4, 6, 8, 10 & 12 all 18' lengths

Full Units 1 (3/4") x 4, 6, 8, 10, 12 & 16 all 18' lengths
5/4 (15/16") x 4, 6, 8, 10, 12 & 16 all 18' lengths

Call for Sheets, Corners, Mouldings, Wraps & Accessories



Cortex Fasteners for Kleer PVC Trim
The fastest, easiest way to hide fastener heads when installing Kleer PVC Trim. The finished look of Cortex for Kleer PVC trim is virtually invisible and can be painted if desired. ACQ approved.

Versetta Stone®

The beauty of stone, the simplicity of siding.

BORAL®

No Mortar. No Mason. No Mess.

- Installs just like siding
- Class A Fire Rating
- Backed by a 50-year limited warranty*
- NAHB Green Approved Product
- Minimum of 50% recycled content as validated by UL Environment™
- International Building Code and International Residential Code Compliant

Flats & Universal Corners

FLAT PANEL

The main component of the Versetta Stone® system, the Flat Panels are 8” x 36” or two square feet and weigh approximately 17 lbs. Each panel is embedded with a 26 gauge, G-90 galvanized nailing flange that allows easy installation. The 3/16” offset and predrilled weep holes in the nail strips are important parts of our moisture management system, allowing moisture to flow between the panel and the wall, eventually exiting the starter strip installed at the bottom of the wall system.

UNIVERSAL CORNER

Manufactured using the same process as our Versetta Stone® Flat Panels, the Universal Corner is designed to be used for outside and inside corners as well as end wall terminations. The Versetta Stone® Universal Corner is the perfect component to manage corners and transitions.

st	**6) SIMPLICITY TOOL:** • Aluminum Junction Flashing to act as a weather resistant barrier behind butt joints. • Primed Lap Siding Corners available in both smooth & textured to give the appearance of a mitered corner. • Primed Shake Siding Corner with vertical grain patterning for finishing corners.
QE quality edge	**7) QUALITY EDGE COIL STOCK:** • Aluminum product made specifically to match the ColorPlus line. Ideal to help meet all James Hardie flashing requirements such as roof, deck, step, window, door and drip edge. • 24" x 50' rolls. Match on 6 colors. Accent color available for remaining colors.
PacTool INTERNATIONAL	**8) PACTOOL:** • PacTool diamond tip Hardie Blades generate less dust than traditional circular saw blades. • PacTool Hardie Blades available in 7.25", 10" and 12" diameters. • PacTool Gecko Gauge hangs on previous board & sets exact exposure. Hang Hardie with 1 person! 48% faster than chalk lines. • PacTool Gecko Gauge sold in pairs of 2 per package and fits any toolbelt.
FRY REGLET ARCHITECTURAL METALS Special Order	**9) FRY REGLET™ PROFILES:** • This product is directed toward HardiePanel application. Product is aluminum and comes with a paintable chemical film or a clear annodized finish. 7-10 day lead time. • Available in: J Channel, Inside/Outside Corners, Vert./Horiz. Extrusion, Drip Cap and Backing Strip.
EZ NEW Shear "Make the Cut!"	**10) EZ SHEAR™ CUTTING TOOL:** • "Guillotine" style cutter that produces a factory style edge, produces NO dust, can be used on scaffolding, needs NO electricity. Blade lasts 10,000 cuts. • Comes with sharpening stones. Adjustable arm for angle cuts sold seperately.

No Other Trim Performs Like MiraTEC.

- Resists moisture, rot and termites.
- Reversible with a clear, cedar wood grain texture on one side and a smooth surface on the other.
- Handles like wood; easy to machine, cut and nail.
- Won't check, split or crack.
- TEC™ patented process makes MiraTEC a solid board that has uniform properties throughout.
- Primed with an ultra-low VOC primer containing a mildewcide.
- Building code compliant (ESR-3043): MiraTEC is the first and only wood composite trim to earn an evaluation report (ESR-3043) from ICC-ES.

MIRATEC® Trim Available In:

4/4" x 2", 3", 4", 5", 6", 8", 10", 12" & 16" All in 16' Lengths
5/4" x 2", 3", 4", 5", 6", 8", 10", 12" & 16" All in 16' Lengths
5/4" x 4" & 6" All in 16' Lengths

OSI QUAD MAX

- Can be used on a wide range of materials
- Can be applied in temperatures as high as 140° F and as low as 0° F

FastenMaster
FASTER EASIER STRONGER

Cortex: Fastened in the same way as traditional deck boards, these plugs provide a perfect color match that hide the screw head completely. The screws are guaranteed corrosion resistant, ACQ approved and don't require predrilling. Made in the USA
Available in: All Trex Transcend and Trex Select colors

Trim Top: Stainless steel, square drive, head painted screws to secure fascia and guaranteed not to rust for the life of the project. #8 gauge screws provide a strong connection and with multiple lengths and package sizes available, finishing the project just got easier.

Timber Lok: Stronger than 3/8" lag bolts, these screws require NO predrilling and are ACQ approved. The tapered head counter-sinks into wood to give a nice finished appearance and with lengths ranging from 2-1/2" to 10" there is a screw for every project. Just to top it off, there is a free bit in every package.

Thru Lok: This screw bolt fastener will make jobs move much faster than with carriage bolts. There is no predrilling, no special drill bits and no wrenches required. The galvanized coating allows for use with treated lumber and it comes with a lifetime performance guarantee.

Head Lok: The sharp gimlet point allows for fast installation into wood and OSB with out having to predrill. Head Loks have a wafer head that eliminates the need for washers and an aggressive thread for holding and withdrawl strength. The star drive head reduces the chance of striping and a free Spider Drive bit is included in every package.

Truss Lok Z: Approved for single sided installation and made to prevent gapping or cupping between two, three, and four-ply girders. They are the ideal fastener for carrying beams, headers, and other multi-ply applications and require no predrilling. The lengths that are available are made specifically to secure boards in an up to four-ply dimensional wood project.

Ledger Lok: This fastener is stronger than 1/2" lag bolts, have a built-in washer head design and are approved for use in ACQ lumber. It is the perfect fastener to attach deck ledgers to wooden house structures with ease.

Truss Lok: All of the great benefits of the Truss Lok Z, but made specifically to work with engineered wood products, this fastener will save time and money with a higher side load capacity that will cut down on the amount of fasteners needed on each job and Truss Loks are specified by Trus Joist, Boise Cascade, GP and other leading wood manufacturers.

Guard Dog: An exterior wood screw with a unique PoziSquare Drive, #2 square drive and phillips drive. These fasteners are fully tested and fully guaranteed corrosion resistant in ACQ, cedar, redwood and copper azole. There is a free bit included in every package.

Trio: This deck screw will provide excellent results with softwood decking like cedar, redwood, and pressure treated decking. Equipped with a #25 Torx TTAP head, a ThruPOINT tip and two different thread sizes on the shaft, Trio screws will resist splitting and eliminate the wedging effect while providing a strong connection from the deck plank to the frame. The plating and coating on these screws deliver corrosion resistance 2x better than standard deck screws. The lid on the 5# boxes come with a TRIO Spotter Installation Guide that will not only provide consistent spacing of the screws themselves, but also of the deck boards, helping to create a beautiful, professional appearance whether being installed by a contractor or DIYer alike.

DECK CONNECTORS

QUIK DRIVE

Quik Drive® Auto-Feed Systems increase productivity while providing superior fastener performance, fastening has never been as fast or as cost-effective. Collated-screw fastening tools are replacing traditional nail guns for their speed, reliability and power. Quik Drive® auto-feed screw driving systems are easy to use, durable and designed for a wide variety of fastening applications. Featuring quick-loading screw strips, precise countersink adjustment and a patented auto-advance mechanism, Quik Drive tools save time and expense on jobsites every day.

International Bildrite® Inc.
Fiberboard Manufacturing

Bildrite Sheathing: This strong, durable board is manufactured from hardy northern wood fibers and incorporates up to 15% recycled fiber. Asphalt impregnation increases strength and adds a high resistance to moisture.

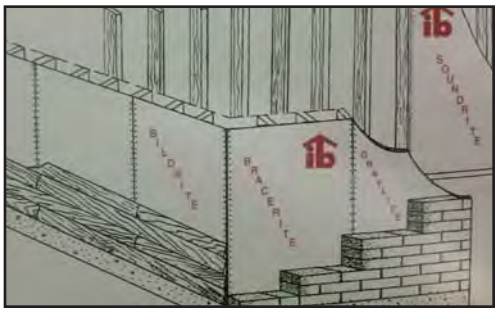
ADVANTAGES	PROPERTIES	
Superior Moisture Resistance	Thickness	25/32”
Structural Rigidity	Vapor Permeance	25+ Perms
Dimensional Stability	Water Absorption	3.5% by Vol.
Reliable Service	R-Value	2.06
CERTIFICATIONS & COMPLIANCE	**SIZES**	**PIECES/UNIT**
ASTM C208 & C209	4x10	60
Third party certification as required by	4x9	60
International Building Code (IBC)	4x8	60

Bracerite Sheathing: This strong, durable board is manufactured from hardy northern wood fibers and incorporates up to 15% recycled fiber. Asphalt impregnation increases strength and adds a high resistance to moisture.

ADVANTAGES	PROPERTIES	
Superior Moisture Resistance	Thickness	1/2”
Structural Rigidity	Vapor Permeance	20 Perms
Dimensional Stability	Water Absorption	3.5% by Vol.
Reliable Service	R-Value	1.22
CERTIFICATIONS & COMPLIANCE	**SIZES**	**PIECES/UNIT**
ASTM C208 & C209	4x10	90
Third party certification as required by	4x9	90
International Building Code (IBC)	4x8	90

Soundrite Sheathing: This strong, durable board, incorporating up to 15% recycled fiber, can be used in many applications where sound deadening is desired. Suitable for interior applications, this board is ideal for cutting sound transmission between interior rooms, between floors, or isolation from outdoor sound.

ADVANTAGES	PROPERTIES	
Excellent Sound Deadening	NRC	.035
Dimensional Stability	STC	25
Reliable Service	R-Value	1.32
CERTIFICATIONS & COMPLIANCE	**SIZES**	**PIECES/UNIT**
ASTM E90-90, E413-87, E795-93 & C423-90A	1/2” 4x8	90



WIP 100 Ice and Water: 55 mil underlayment for use on areas such as eaves, ridges valleys, dormers and skylights. Rubberized asphalt, fiberglass-reinforced membrane coupled with a granular surface provides excellent skid resistance. Easy to apply with a split release film and rated for 30 day exposure. UL classified; FL #6785; ICC-ES ESR 1556; Miami-Dade approved. Available in 1 sq and 2 sq rolls.

WIP 300 Ice and Water: 40 mil, high temperature underlayment designed for use under metal, including copper, zinc and COR-TEN; can also be used under synthetic, concrete, and clay tiles and asphalt shingles. The skid resistant polyolefin film laminated to a thick layer of rubberized asphalt is easy to apply due to the split release film and has a minimum of a 60 day exposure. UL Classified; FL #6785; ICC-ES ESR 2206.

Felt: Asphalt saturated organic felt. 36"x144', 432 sqft. rolls are available in both 15# and 30#. Boise Cascade BMD only carries ASTM 4869 rated felt to ensure it meets local building codes.

Ram Board: Ram Board is a heavy-duty, temporary floor protection engineered for contractors. Designed with cost and efficiency in mind, it lays out fast and is re-usable. Ram Board is non-staining and utilizes Flex-Fiber™ technology allowing for the proper curing of new floors on jobsites. Exclusive Spill Guard™ technology provides added protection against water, paint, mud, and more. Ram Board provides proven and trusted protection for new and existing concrete, wood, tile, stone, linoleum, vinyl composition tile(VCT), epoxy and most other floor types. In terms of floor protectors Ram Board is the #1 choice among contractors worldwide. Ram Board is committed to being a good steward of the environment. It is composed of 100% recycled materials and contributes toward LEED credits.

BOSS Woven Polyester Strapping: Safer and just as strong as similar sized metal banding, BOSS Strapping is lighter, and easier to work with and won't "pop" and hurt product or people. BOSS Strapping has been tested by break test strengths and also system break tests to ensure that not only is the strapping durable but the entire system, strap and buckle are strong enough to get the job done right the first time. The strapping and buckles are available in: ¾" and 1½" widths.

Poly Sheeting: Made by Poly America and stocked in both 4 mil and 6 mil in various widths and lengths, there is a poly right for every job. Both black and clear polys are available. Product is made from 100% recycled material.

Reinforced Poly Sheeting: Made by Raven Engineered Films this durable line of DURA-SKRIM® R Series products are manufactured using two outer layers of high-strength virgin polyethylene laminated together with a third layer of molten polyethylene. Diagonal polyester scrim reinforcement is placed between these plies to greatly enhance tear resistance and increase service life. This results in a strong, light-weight material that is excellent for use as an enclosure or liner in many conditions. Stocked in 12', 16', 20' & 24'

Protect Against Moisture, Air, Water Leaks & Corrosion with

GRACE
Construction Products

With today's innovative designs, reducing risk requires advanced envelope solutions that maximize building performance. Your building must perform flawlessly under a wide variety of conditions—year after year—while delivering ultimate moisture protection and long-term durability. Count on Grace Construction Products for comprehensive solutions to protect your building envelope's integrity—as well as your own.
