TrexPRO®

PLATFORM OVERVIEW

A loyalty program that actually builds your business

As the world's #1 decking brand, Trex® offers business-building rewards to its well-qualified partners.

The TrexPro® platform makes it easy to increase your company's exposure with a customizable marketing program and win over customers with our long-lasting, low-maintenance products.

TrexPro®
A program of leads, tools and leverage

ENGAGE: How You'll Reach Customers

MEET THEM WHERE THEY'RE LOOKING

» Online presence
- Build your complimentary, SEO-friendly profile page on Trex.com
- Upload photos to showcase your company to prospective clients
- Feature satisfaction survey results, automatically posted by Trex

» Co-branded tools
- Spread the word with vehicle wraps, business cards, yard signs and more

EXCEL: How You'll Keep Them Happy

A SATISIFIED CUSTOMER IS A REFERRING CUSTOMER

» Register your customers' warranties on their behalf

» Trex will send a welcome kit including a Customer Satisfaction Survey, warranty documents and Care & Cleaning Guide to your customer

TrexTranscend®

## Outperforms, outresists, outlasts . . . basically OUTDECKS ALL OTHERS

- Unparalleled Beauty. Distinctive, high-definition wood grain patterns are engineered with a low sheen, high-traffic technology that makes it last for decades longer than anything out there

- Hassle Free. Virtually indestructible shell, that's fade, stain, and scratch resistant, and cleans easily with soap and water

- Earth Friendly. Made of 95% recycled materials, with manufacturing processes that are as green as they get

- 25-Year Limited Fade and Stain Warranty

Tropical Colors:

Havana Gold   Spiced Rum   Tiki Torch
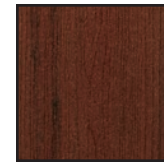

Lava Rock   Island Mist

Classic Earth Tones:

Tree House   Fire Pit

Rope Swing   Vintage Lantern

Gravel Path

Available in:

Three Boards. One Fastener.

PVC **Capstock** **Composite**

The FastenMaster TrapEase 3 is the only fastener guaranteed to create a clean finished look without pre-drilling in all three types of synthetic decking: Composite, PVC and Capstock. The new anti-strip Torx® TTAP® drive system, and a lifetime corrosion warranty make TrapEase 3 the Ultimate Composite Deck Screw.

Torx® TTAP® Drive System

The new TrapEase 3 Torx® TTAP® Drive System features a stability button which delivers unmatched stick-fit and wobble free installation that eliminates fastener strip out.

FastenMaster Spotter™

Much more than a lid, the Spotter is a installation guide that reduces installation time by consistently placing the fasteners and gapping the deck boards.

For more information or a product demo call a fastener expert at 800·518·3569

The Look of Wood. The Luxury of Low Maintenance.

For the real look of wood, without the inherent maintenance, look no further. Here, you'll find the look you want—the style, curb appeal and elegance of wood—from Kleer PVC trim products. Plus, TruEdge technology provides a sealed edge that resists staining from dirt and grime, and easily wipes clean if dirt comes in contact with the trim-boards.

Kleer's innovative **TruEDGE® Technology** provides sharper, cleaner edges that resist dust and dirt, and a smooth finish that's easier to clean than wood trim or PVC boards with no sealed edge. Infused with UV inhibitors that prevent yellowing, they are perfect for creating authentic accents around windows, doors and more.

Available in:
Boards

Kleer Packs 1 (3/4") x 4, 6, 8, 10 & 12 all 18' lengths
        5/4 (15/16") x 4, 6, 8, 10 & 12 all 18' lengths

Full Units   1 (3/4") x 4, 6, 8, 10, 12 & 16 all 18' lengths
   5/4 (15/16") x 4, 6, 8, 10, 12 & 16 all 18' lengths

Call for Sheets, Corners, Mouldings, Wraps & Accessories

Cortex Fasteners for Kleer PVC Trim
The fastest, easiest way to hide fastener heads when installing Kleer PVC Trim. The finished look of Cortex for Kleer PVC trim is virtually invisible and can be painted if desired. ACQ approved.

Ram Board®

SIZE: 38"x100' (317 SQ.FT.) | WEIGHT: 48 LBS. | THICKNESS: 46 MIL

ITEM NUMBER: #5018131

FEATURES & BENEFITS

- Heavy-duty temporary floor protection
- Exclusive Wall Guard® feature
- Vapor-Cure® technology
- Flex-Fiber® technology
- Save on labor & damage repair
- FSC® certified - recycled/recyclable
- Non-staining
- Reusable
- Lays out fast
- Spill Guard® technology
- 16 per pallet

Seam Tape®

SIZE: 3"x164' (72 MM x 50M) | WEIGHT: 1 LBS.

ITEM NUMBER: #5018150

FEATURES & BENEFITS

- Contractor grade adhesive
- 3" width easily covers Ram Board seams
- Engineered to work specifically with Ram Board
- Unique kraft backing tears easily and creates an extremely durable, smooth finish
- 100% recyclable
- 16 per case

Moisture Management • Energy Efficiency

Type IV
25 PSI
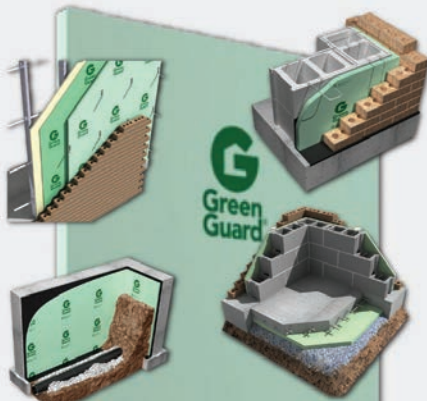

GreenGuard® XPS Insulation Board is ideal for applications where moisture resistance and long-term R-Value are desired. As Continuous Insulation (Ci) in walls, slabs and foundations, GreenGuard® XPS provides R-Value of 5 per inch of thickness. XPS Type IV is suitable for applications requiring up to 25 PSI compressive strength. With low water absorption, light weight, and easy cutting, GreenGuard® XPS is a workable, effective insulation choice.

GreenGuard® MAX™ Building Wrap is a recognized air barrier listed with www.airbarrier.org, and has demonstrated water holdout capabilities in industry-recognized water resistance tests. This non-perforated wrap also breathes to allow moisture vapor to escape. With its high tear resistance, it is suitable for commercial and residential applications. It remains UV stable up to 6 months.

Water Barrier • Air Barrier
Commercial Grade Durability

Virtually Unrestricted Drainage and Drying
GreenGuard® DC14 Drainage Mat is a unique, light-weight polystyrene mat used for water drainage and air movement behind substrates.. It does not absorb water and is resistant to wood chemicals. Drainage channels on 2-sides.

1/4" x 4' x 48' Fanfolded Bundle

GreenGuard® Butyl Flashings provide high-performance water resistance for walls. They adhere across a broad range of installation temperatures, ensuring effectiveness in all climates. And they conform to irregular surfaces, eliminating gaps that could create water canals. **GreenGuard® SuperStretch™ Butyl Flashing** stretches in any direction and sticks tight, making it easy to use and effective for curved surfaces and corners.

Protect Against Moisture, Air, Water Leaks & Corrosion with
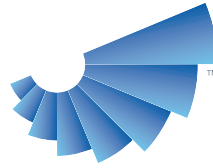

gcp applied technologies
GRACE CONSTRUCTION & PACKAGING

With today's innovative designs, reducing risk requires advanced envelope solutions that maximize building performance. Your building must perform flawlessly under a wide variety of conditions—year after year—while delivering ultimate moisture protection and long-term durability. Count on GCP Applied Technologies for comprehensive solutions to protect your building envelope's integrity—as well as your own.

PRODUCT SELECTION GUIDE

	Self-Adhered Smooth Surface Underlayments				Synthetic Underlayments	
	Grace Ice & Water Shield®	**Grace Ice & Water Shield® HT**	**Grace Ultra™**	**Grace Select™**	**TRI-FLEX® XT**	**TRI-FLEX® 15**
	The Original, Best in Class Underlayment	Meets the Challenges Inherent in Metal Roofs	Designed for Extreme Temperature Roof Assemblies	The Performance Alternative to Granulars	Premium Performance Synthetic Underlayment	Performance Alternative to #15 Felt
Key Benefits	• Versatile – Suitable for use under most roof coverings, including asphalt shingles, mechanically attached tiles and most standing seam metal roofs • Highest quality seal around roofing fasteners – Provides confidence that your client's roof won't leak • Strong adhesion to the roof deck – Prevents costly leaks caused by ice dams and wind-driven rain • Easily forms watertight laps – Provides watertight installation with NO special treatment of the laps • Ripcord® Split Release on Demand – Makes it easier to waterproof detail areas such as valleys, chimneys and roof-to-wall transitions	• High thermal stability – Suitable for high temperature roof designs including most metal roofs and heavily insulated assemblies • Highest quality seal around roofing fasteners – Delivers best in class roof leak protection • Strong adhesion to the roof deck – Ensures watertight seal so you can be confident that your client's roof won't leak • Easily forms watertight laps – Provides watertight installation with NO special treatment of the laps • Ripcord® Split Release on Demand – Simplifies installation around detail areas	• 100% butyl adhesive – Ideal for use in elevated temperatures, for copper, zinc and COR-TEN® roofs, or any application where superior heat resistance is required • Superior protection for expensive metal roofs – Protect your clients' high-end roof coverings with Grace UltraS™ uniquely formulated solution • Strong adhesion to roof deck and forms high quality laps – Ensures watertight seal and premium leak protection • Compatible with EPDM and TPO roofing materials – Provides watertight transition between low slope and steep slope roofs	• Lightweight – Great performance at minimal weight • Superior lap adhesion – Better protection against leaks • Re-roofable – Shingles can be easily removed from existing Grace Select™ underlayment during re-roofing • Higher adhesive content; no fillers – Strong defense against ice dams and wind-driven rain • Proprietary film surface – Superior foot traction without loose granules; scuff free surface	• Improved Slip Resistant Surface – New coating provides superior foot traction • 2.3 times more coverage per roll – Increased efficiency • 20 times stronger – Withstands higher wind conditions • Durable – Can be left exposed up to 6 months • Lighter weight – Fast and easy installation • 100% recyclable – Contributes to sustainability and LEED	• 10 times stronger – Withstands higher wind conditions • Slip resistant surface – Provides superior foot traction • 5 times more coverage per roll – Increased efficiency • Lighter weight – Fast and easy installation • 100% recyclable – Contributes to sustainability and LEED
Exposure	90 days	120 days	120 days	30 days	180 days	60 days

BC FRAMER®

New BC FRAMER® represents a huge technological leap to help you improve the efficiency and profitability of your engineered wood products business. Boise Cascade will provide you what we believe is now the industry's best design software, offering far greater productivity than even our current version of BC FRAMER®. This new software package will help your design department work faster and accomplish more. You don't get paid to do drawings, but at least now you can do them in less time, and better.

- Shrink design time with BC FRAMER® model sharing.
- Save time & prevent mistakes with best-in-industry file integration.
- Experience the efficiencies of BC FRAMER® whole house modeling.
- Draw floor and wall plans simultaneously with BC FRAMER®:
- Check the plan every possible way with BC FRAMER® full 3-D viewer.
- Create a master plan and multiple options that can be quickly selected and exported to a plot-specific file in a few minutes – a fraction of the time it could have taken in the past.

Information can also be obtained at 1-800-405-5969 or email us at EWPSupport@BC.com.
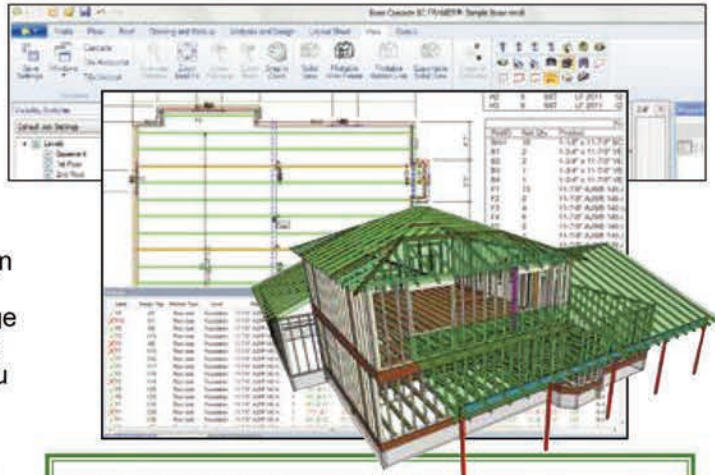

RECOMMENDED HARDWARE
- **CPU:** Quad Core 64 bit Processor
- **L2 Cache:** 3MB/Core
- **RAM:** 4.0GB to 8.0GB
- **Video:** Full support for DirectX 9; Single monitors, 1280x1024 128MB; Dual monitor, 1280x1024 256MB (Minimum 1024x768)
- **Operating Systems:** Windows® 7 or 8 (Professional Editions 32-bit and 64-bit)

Actual specifications vary by user and will be assessed prior to installation.

Give Us a Try!

BC CALC® 4.0 Sizing Software

BC CALC® is simple to use, yet robust enough to analyze most all joist, beam, and column applications. Once an analysis is run, the user may print an easy-to-read design report that displays the span and load information with the analysis results.

BC COLUMN® has now been merged into BC CALC®, allowing the sizing of joists, beams, rafters, columns, and studs all in one convenient program.

In addition to BCI® & AJS® Joists, VERSA-LAM®, and BOISE GLULAM®, BC CALC® also offers the analysis of solid sawn lumber and timber members. Thus BC CALC® is the only program needed to analyze structural wood members.

BC CALC®
Analysis for Engineered Wood Products

Boise Cascade has provided BC CALC® free of charge to the design community since 1994.

COMPUTER REQUIREMENTS
PC with any current version of MS Windows®, along with an internet connection. For questions regarding BC CALC®, call 1-800-405-5969 or email EWPSupport@BC.com.

With its high-quality faces and stable composed-core construction, ARAUCOPLY offers a mix of Sanded, Beaded and Siding plywood that delivers the flatness and stability needed for casework, underlayment, coffered ceilings and other high-performance applications, inside and outside. All our panels are made from certified, sustainable plantation-grown pine, so they perform right for the environment as well.

ARAUCOPLY™

Sanded Panels

Product Features
- 100% Radiata Pine
- Stable composed core with minimum voids
- High quality solid face
- Ideal for interior and exterior applications
- Pre-sanded and ready to finish
- Allows a variety of finishes
- 7 Ply 23/32" construction enhances stability

A Grades
- No more than 6 wood patches
- No more than 6 synthetic repairs

B Grades
- Limited wood patches
- No more than 8 synthetic repairs

Cp Grades
- All type of repairs are accepted
- Open defects are not accepted

Applications
- Staircases
- Table and counter tops
- Base panel for high-pressure lamination
- General industrial applications
- Cabinets and furniture
- Underlayment
- General DIY projects

Beaded Panels

Product Features
- 100% Radiata Pine
- Stable composed core
- Ideal for interior and exterior applications
- Pre-sanded and ready to finish
- Available in shiplap and square-edge
- 2"OC beaded pattern
- 150 grit sanded

Natural Bead
- Clear face
- No wood patches
- No synthetic repairs
- Ideal for staining

Star Bead
- No more than 6 wood patches
- No synthetic face repairs
- Perfect for painting

Applications
- Wainscoting
- Decorative paneling for interior
- Exterior Porch Ceilings
- Soffits
- Cabinets
- Furniture

Siding Panels

Product Features
- 100% Radiata Pine
- Composed core
- Less resinous face
- Uniform light color
- Easily accepts paints and stains
- Rough sawn surface texture
- Available in: shiplap and square-edge

Premium Siding
- No more than 6 wood patches
- No synthetic repairs

Siding
- Limited wood patches
- No more than 8 synthetic face repairs

Applications
- Siding

ARAUCO

For more than 45 years, ARAUCO has been driven forward by its vision of being a global leader in the development of sustainable forest products, which has allowed us to become one of the largest and most respected forestry companies in the world.

ARAUCO's success is based on satisfying our customers with quality products and services while balancing the company's needs with those of our employees, the environment, and the people who live near our facilities and plantations. This is the starting point for the responsible and efficient management of our natural resources, the occupational health and safety of our workers and our active contribution to social development and welfare in the communities in which we operate.

All ARAUCO-branded products sold in North America originate in sustainably managed plantation forests in Chile, Brazil, Argentina, and Uruguay. No native forest wood or genetically modified trees are used to produce any ARAUCO product.

PYRO-GUARD®

INTERIOR FIRE REARDANT TREATED LUMBER AND PLYWOOD

- **PYRO-GUARD** is manufactured by Hoover Treated wood Products utilizing the highest quality components.

- **PYRO-GUARD** is available in an array of species for lumber & plywood including Southern Yellow Pine, Spruce And Douglas Fir.

- **PYRO-GUARD** PLUS resists termite attack and decay in weather-protected, above ground applications including direct contact with concrete on grade.

- ICC-ES-ESR-1791 demonstrates that **PYRO-GUARD** is fully compliant with the building code requirements for "Fire Retardant Treated Wood".

- **PYRO-GUARD** PLUS is for use against termite & fungal decay, and contains an EPA registered pesticide.

- **PYRO-GUARD** treated wood products are 3rd party monitored by Underwriters Laboratories (U.L.) and Timber Products Inspection (T.P.I.). Quality Control is provided at all Hoover **PYRO-GUARD** manufacturing facilities and overview QC is provided by Hoover Corporate Laboratory facilities.

- Hoover's **PYRO-GUARD** chemical and treating facilities are at the same plant locations. They manufacture their own formulations.

- Hoover's **PYRO-GUARD** Warranty is comprehensive and straightforward.

- The **PYRO-GUARD** Warranty follows the product owner. Warranty registration is never required. Please refer to the one-page **PYRO-GUARD** Warranty for more information.

- Visit **www.FRTW.com** for warranty information and supportig technical documents.
